Subject: Microsoft settlement

I think it is time to get off Microsoft's case.

I have been using Microsoft since the late '80s and have not found other to take its place.

I do not view Microsoft as a monopoly. I have used other operating systems and have found Microsoft has the most sound systems for users and is very user conscious.

When installing new versions of Microsoft I have options for different internet access and can set my system to run how I want it. I can easily get updates and software upgrades to keep my computer safe from hackers and viruses. Other companies have the equal right to try to be better than Microsoft but not by degrading one of the backbone companies on our on soil.

It is time to redefine what a monopoly is and let our country get back to business at hand. Turn Microsoft loose and spend the governments funds on more important things like "NATIONAL SECURITY"!!

Thanks you.....
